

RAIVO RUUSALEPP

Raivo has been heading the consultancy services at the Estonian Business Archives since 2001.

His consultancy projects cover both electronic records management and digital archives.

He has been part of several digital preservation research projects on the EU level (DigitalPreservationEurope, Protage, DC-Net), with Digital Curation Centre and JISC in the UK and national archives in the Nordic countries.

He was co-author of two digital preservation assessment tools – DRAMBORA and DAF – and his current research interests lie in the area of applying risk management methods in digital preservation.

He is lecturing (part time) on digital preservation at Tallinn University.

Raivo is a member of the Estonian standards organisation's technical committee on records and archives management and is regularly taking part in the work of ISO TC46 SC11.
